

Supplementary tables

Table S2. CLAIM 2024 checklist summary

Status	Count	Interpretation
Yes	13	Reported or directly auditable in the manuscript/archive
Partial	10	Partly reported or limited by inherited archive constraints
No	4	Not available in the inherited experiment

Table S3. TRIPOD+AI checklist summary

Status	Count	Interpretation
Yes	9	Reported or directly auditable
Partial	18	Partly reported or limited by inherited archive constraints
No	14	Not available in the inherited experiment

Table S4. Provenance manifest

Condition	Source notebook	Seeds	Retained outputs	Known defect or caveat
Baseline CADQ	<code>medvision-q1-audit-final-FIXED-MERGE-v2.ipynb</code>	8	Predictions, probabilities, gate	Duplicate merge snapshot
LMH (PoE)	Same fixed-merge notebook	8	Predictions, probabilities	Lower AUROC and calibration
Noise-Consistency	Same fixed-merge notebook	8	Predictions, probabilities	Archived negative-KL sign
GACR-B	Same fixed-merge notebook	8 post hoc	Predictions, probabilities	Added after initial plan
Adaptive-CADQ	Same fixed-merge notebook	8 (post hoc extension)	Predictions, probabilities	Seed extension post hoc; gate extraction absent
Gray-Square	Audit archive	Single retained run	Predictions, probabilities	Reused control for paired ICM
